I've lived in Hawaii most of my life and watched as local families and friends leave Hawaii for opportunities elsewhere. I have children in elementary school where teachers are under-paid and supplies are short. Hawaii educationally is near the bottom and surveys have placed Hawaii dead last as a place to do business.

Nearly all of our best and brightest young people leave Maui for the mainland in search of educational or career opportunities. In my opinion, the cause has been years of poorly thought-out policies.

Since leaving my mother and sisters on Kauai, and moving to Maui 16 years ago, I've dedicated myself to helping people in all walks of life. I have served as a Grace Church's pastor since 1988, and been involved with Rotary Club, Boys' clubs, Youth groups, Drug Rehabilitation, the State Probation Department, and chaplain at the hospital. I established the Upcountry Food bank, and one of Maui's most prestigious private schools, Carden Academy. I worked hard to save traditional marriage. I have a strong business and education background.

Hawaii has the highest state income taxes in America. Yet it has not provided us with the best health care, educational system, public transportation, or affordable housing. On the contrary, we are struggling with all these issues.

Help me change this by electing me to the Senate from the Upcountry, Hana, Moloka'i, and Lana'i District.
